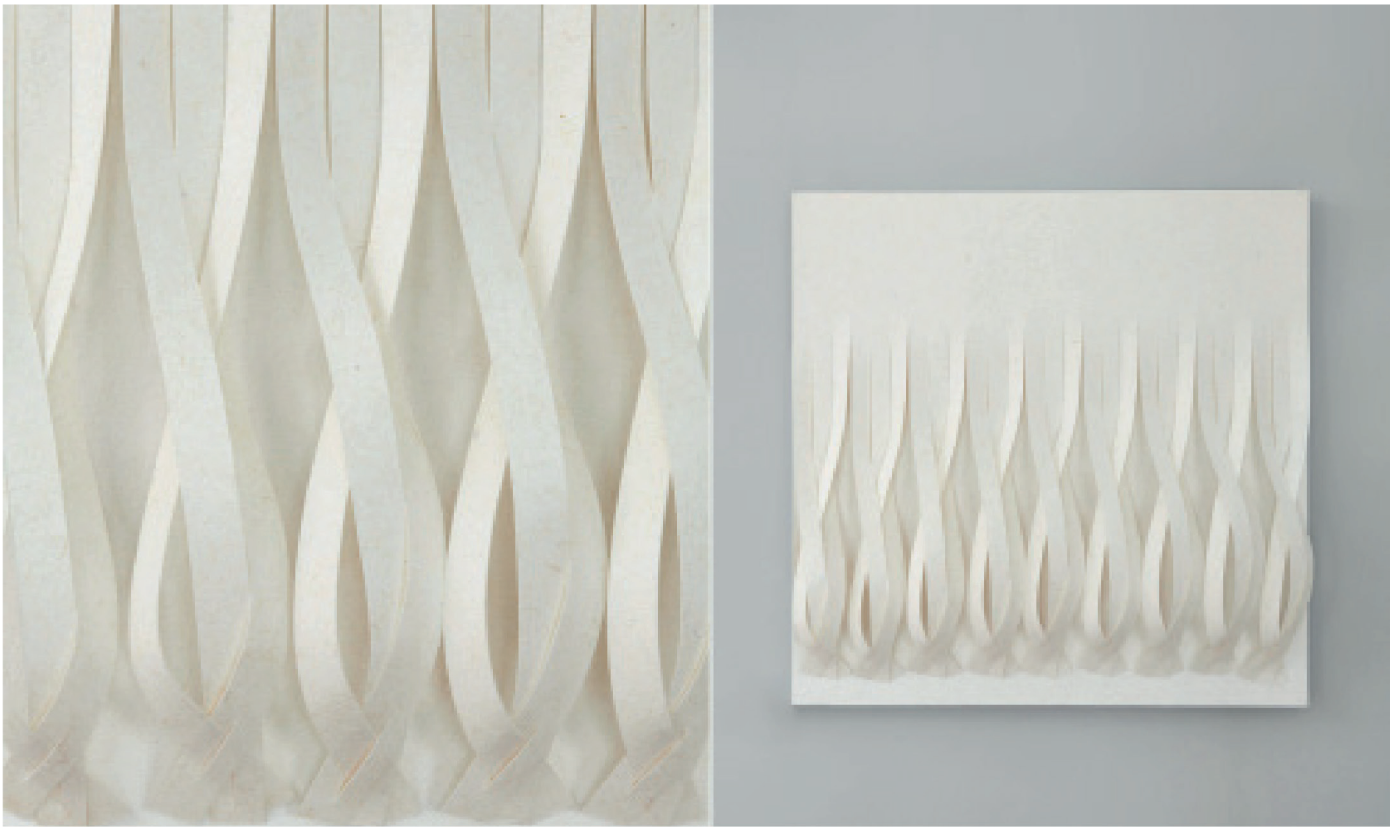
PARALLEL LINES

Acoustic wall panel
Design by: Anna von Schewen



Parallel Lines is a sound-absorbing wall panel and acoustic artwork, designed by Anna von Schewen. The material is hemp, a natural and sustainable material with a negative carbon footprint. Hemp's sound-absorbing properties are of the highest quality, and Parallel Lines is a Class A sound absorption product.

Anna von Schewen founded her design studio in Stockholm in 1997 and has, through her distinctive practice, been recognized as one of Sweden's most progressive and experimental designers. Her work spans furniture and objects, exhibition design, interiors, and architecture. Parallel Lines reflects Anna von Schewen's interest and curiosity in the aesthetic expression and functional properties of materials.

With hemp's soft and flexible nature, combined with its reminiscence of both a gentle textile and a firm paper, Anna has found a way to achieve volume and an airy, sculptural sense of calm and light energy, which Parallel Lines expresses. An acoustic relief that creates tranquility through both its sound-absorbing qualities and its elegant artistic expression.

Material: Hemp, recycled paper, and PET fibers

Sound absorption: Class A

Colors: Natural hemp fiber, off-white. Available in all NCS and RAL colors.

Size: 1000 × 1000 mm × 45 mm

Installation: Lightweight and easy to install

Sustainability: Environmentally friendly and sustainable
